

Sustainability qualifications

A guide for educators in China
November 2022

问创
VENTURE

Venture Education

Venture Education empowers international education in China through research, projects and consultancy. Our team is a mixture of former teachers, university lecturers, education professionals, research analysts and project leaders from the UK and China. We are always open to new projects, love to make ideas happen, and care about what we do.

Qualifications in sustainability

This booklet serves as a resource for educators who are currently in China, passionate about sustainability, and are interested in forging their own path by undertaking professional development in a field ever more important to education, worldwide.

"You cannot get through a single day without having an impact on the world around you. What you do makes a difference, and you have to decide what kind of difference you want to make."

- Jane Goodall

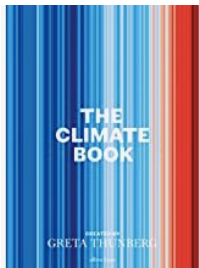

First things first

How serious are you about sustainability?

Before you begin to look at the wealth of training courses that are out there for you, it's a good idea to get a general understanding of the issues surrounding sustainability. If you find yourself developing special areas of interest, there may be some targeted courses that will be more useful for you.

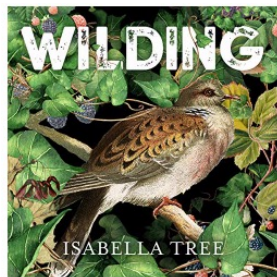

There are lots of ways in which you can get 'savvy' about sustainability!

To Read

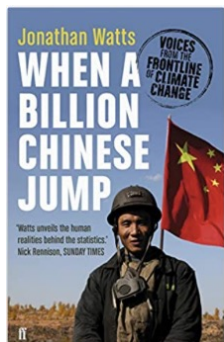

***The Climate Book: Greta Thunberg* by Greta Thunberg (coming out this month 2022)**

Amazon says: 'We still have time to change the world. From Greta Thunberg, the world's leading climate activist, comes the essential handbook for making it happen'

***Wilding: The Return of Nature to a British Farm* By Isabella Tree (of course!) 2019 in brackets. 2019**

'Tells the story of the 'Knepp experiment', a pioneering rewilding project in West Sussex, using free-roaming grazing animals to create new habitats for wildlife. Part gripping memoir, part fascinating account of the ecology of our countryside, Wilding is, above all, an inspiring story of hope.'

***When a Billion Chinese Jump: Voices from the Frontline of Climate Change* by Jonathan Watts (2011)**

'Traveling the vast country to witness this environmental challenge, Jonathan Watts moves from mountain paradises to industrial wastelands, examining the responses of those at the top of society to the problems and hopes of those below. At heart his book is not a call for panic, but a demonstration that - even with the crisis so severe, and the political scope so limited - the actions of individuals can make a difference.'

***The End Of The Line* by Charles Clover (2003)**

'Fish is the aspirational food for Western society, the healthy, weight-conscious choice, but those who eat and celebrate fish often ignore the fact that the fishing industry, although as technologically advanced as space travel, has an attitude to conservation 10,000 years out of date. [...] The End of the Line looks at the problem and proves that we, as consumers, have to change if the situation is to improve.'

***This is not a drill - The Extinction Rebellion Handbook* (2019)**

The Guardian says 'Extinction Rebellion are inspiring a whole generation to take action on climate breakdown'

***There is no Planet B* by Mike Berners-Lee (2019)**

Amazon says: 'This is the big-picture perspective on the environmental and economic challenges of our day, laid out in one place, and traced through to the underlying roots - questions of how we live and think. This updated edition has new material on protests, pandemics, wildfires, investments, carbon targets and of course, on the key question: given all this, what can I do?'

To View

I am Greta (2020)

This documentary follows Greta Thunberg, a teenage climate activist from Sweden, on her international crusade to get people to listen to scientists about the world's environmental problems.

David Attenborough: A Life on Our planet (2020)

The film addresses some of the biggest challenges facing life on our planet, providing a snapshot of global nature loss in a single lifetime. With it comes a powerful message of hope for future generations as Attenborough reveals the solutions to help save our planet from disaster.

My Octopus Teacher (2020)

Netflix Original documentary film directed by Pippa Ehrlich and James Reed, which documents a year spent by filmmaker Craig Foster forging a relationship with a wild common octopus in a South African kelp forest.

Chasing Coral (2017)

A team of divers, photographers and scientists set out on a thrilling ocean adventure to discover why corals are vanishing at an unprecedented rate.

Before the Flood (2016)

Film presented by National Geographic, features Leonardo DiCaprio on a journey as a United Nations Messenger of Peace, traveling to five continents and the Arctic to witness climate change firsthand.

An Inconvenient Truth (2006)

A 2006 American documentary film directed by Davis Guggenheim about former United States Vice President Al Gore's campaign to educate people about global warming.

2040 (2019)

Dir. Damon Gameau: A journey to discover what the future could look like if we simply embraced the best that exists today.

Trailer <https://www.youtube.com/watch?v=p-rTQ443akE>

BBC interview with Damon Gameau: <https://www.youtube.com/watch?v=-2q6sAZ-R8I>

belle verte Dir. Colline Serreau (1996)

French feature film that talks of nature, environment and importance of greenery in our daily existence.

Trailer <https://www.youtube.com/watch?v=bKl1puNaVY>

Sustainability in schools

In July we asked 78 teachers and school leaders from across China their thoughts on sustainability in schools.

Where could your school improve the most?

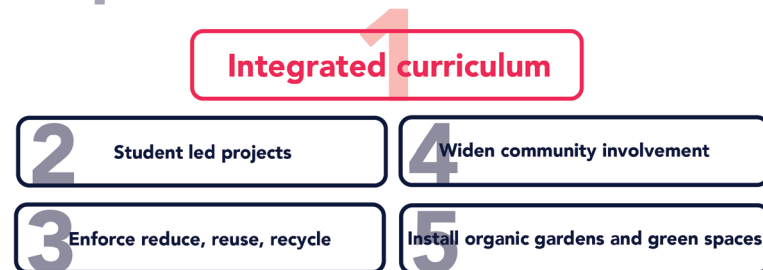

What resource does your school need?

Top 5

What would you do to make your school more sustainable?

Contact charlie@ventureeducation.org to learn more about how we support sustainability in schools

Sustainability in schools

In July this year, we asked 78 teachers and school leaders from across China three questions about sustainability in schools.

And the responses were extremely interesting and from them we learnt a few things:

1. There is clearly a real distinction between where leaders and teachers see the need for improvement... mostly, each other! Forming partnerships and curriculum were important for both.
2. In terms of resources, it's clear that times are tough and budget may be hard to come by... but setting targets seems easier to achieve and 71% of respondents saw this as essential. And who better to oversee progress on these targets that a sustainability lead, with 62% of respondents saying having such a role would benefit their school.
3. The final question was an open question: "If you were made head of sustainability in your school, given a free timetable, and substantial budget, what would you do?" By far the most popular idea was having a real plan and embedding sustainability into the curriculum and DNA of the school... rather than short term measures or one-off sustainability days.

Our conclusion:

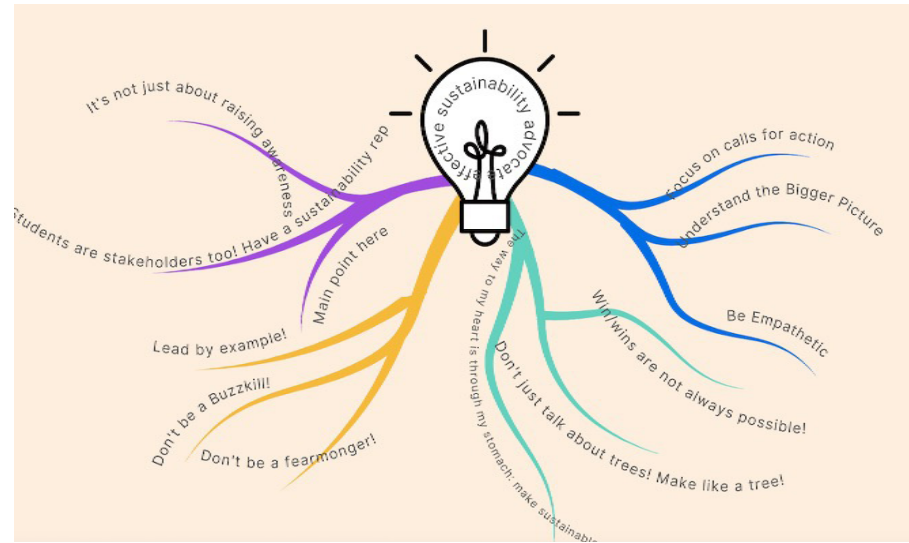

Leaders and teachers in China care about sustainability, want to make things better, and are really excited about making changes in the new academic year.

Our tips on:

How to be an effective sustainability advocate in your school

Focus on calls for action

Raising awareness is great but there must be a next step to share, donate, attend or engage in.

Lead by examples:

Sharing delicious sustainable food choices rather than talking about sustainable food choices.

Understand the bigger picture

If your school is short staffed, requiring their time for a sustainability initiative won't go down well. But it will if the initiative helps attract incredible new talent.

Win/wins aren't always possible

Making a difference often requires a compromise or challenging what is comfortable, be willing to make these sacrifices yourself.

Allow the students to be the stakeholders

Encourage their clubs and groups etc and have sustainability reps on your school council.

Lead by example

be neither fearmonger nor buzzkill.

Be empathetic:

Constantly criticising others might make you feel right but it isn't going to change their mind or lead to structural change in society.

Why Sustainable Schools? The Power of Your Leadership

Curriculum Design with Eco-Literacy and Active Hope

Where Do You Want to Work? Creating a Positive Place and Programmes

Cultivating Community Engagement / Climate Readiness

How it's Done: Changing Processes and Navigating Systems

Documenting Change: Celebrating Success

So, how can you become qualified in Sustainability?

At the end of this booklet you will find a list of courses to choose from that are either in-person courses in China, online courses or, if you are thinking of taking time away from China courses in other countries.

You will see that there is a wealth of online courses at FutureLearn*, Edx and Coursera,

There are short courses or long courses, holiday courses or full Masters and they cover everything from introductory surveys to practical advice and industry or country specific research.

We have chosen a few recommendations as examples, depending on your level of interest, your time and your purse:

I'd like to embed sustainability into my teaching:

- futurelearn.com: Global Education for Teachers UCL (3 wks/3 hrs per week Free + Certificate)
- futurelearn.com: Teaching Digital Skills for Sustainable Education Mind Lab 2 wks/3 hrs per week 14 USD

I'm thinking about transitioning out of teaching one day, or taking a year out postgrad

- MSc Sustainability and Behaviour Change at Centre for Alternative Technology UK
- Pedagogy and Teaching for Sustainability, University of Eastern Finland
- Urbanism and Sustainable Environments University of Ningbo
- Master of sustainable Futures (Research) Sidney University but based in Shanghai

I'm a school leader or want to become one:

- Sustainability Business Leadership PG Cert University of Leeds 8 mths
- Leading Sustainability: High Impact Leadership, University of Cambridge, Cambridge Institute of Sustainability Leadership 8 wks

Organisations in China

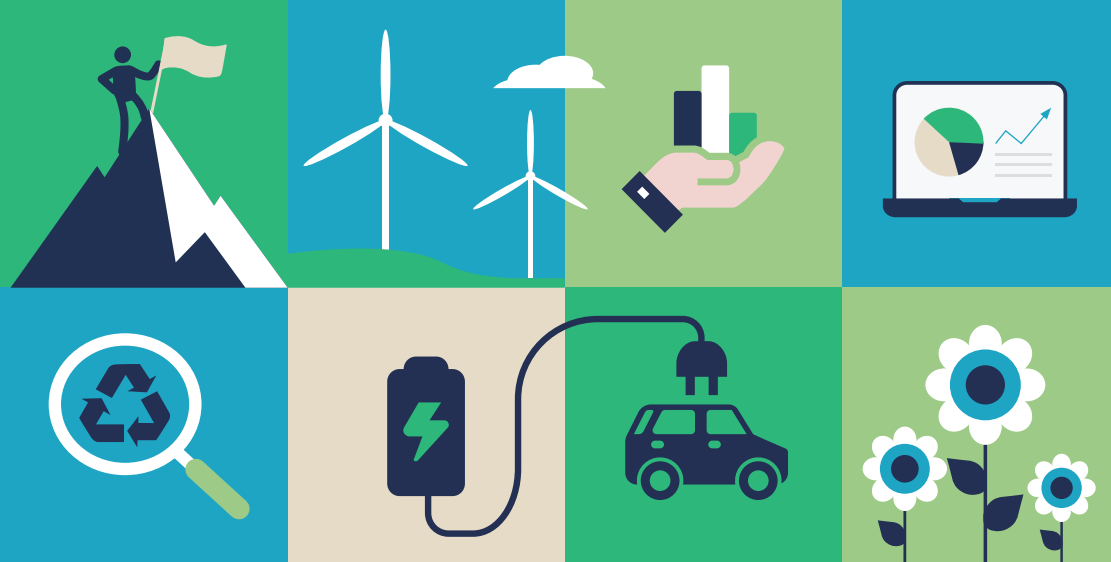

Beijing Field Studies

Sustainable Business Leadership

MSc / Postgraduate Certificate

Online

We are one of the **top 100 universities in the world** and ranked in the **top 15 in the UK** (QS World University Rankings 2023) with a global reputation for excellence in research and teaching. The School of Earth and Environment is ranked in the **global Top 25 for Earth and Marine Sciences** and **Top 40 for Environmental Studies** (QS World University Rankings by subject 2022)

The research expertise in the **School of Earth and Environment** and **Leeds University Business School** feeds directly into the online Sustainable Business Leadership course. **The course content will give you exposure to the issues and concepts highly relevant to a range of organisations and sectors.**

■ **Our 2023 intake is now open. Scan the QR code to begin talking with an enrolment advisor.**

■ **Two years' online study to achieve master's degree**

■ **Flexibility to preserve your work-life balance while earning your degree**

■ **A global network of like-minded professionals to enhance your career profile**

■ **Student fees for the programme will be billed on a modular basis:**

From September 2022 onwards, the fee is composed of nine taught modules (15 credits each, £1,650 per module) and project module fee (45 credits, £2,650).

Our 2023 intake is now open. Scan the QR code below to begin talking with an enrolment advisor.

UNIVERSITY OF LEEDS

Beijing is amazing. It is also our backyard.

BFS's field trips and residential courses build connection, confidence and consciousness of the world around us, and are aligned with IB and UK national curriculums. Email or scan below to connect your outdoor team to ours, and receive a full list of programme and residential offerings in Beijing.

- K-8 day trips
- G6-12 residential trips
- Experienced international team of outdoor educators
- EAL and literacy support built into activities as standard
- International safeguarding standards
- Flexible scheduling allows for changes due to weather and COVID
- Passionate about learning and a lot of fun

Incredibly varied climate and wildlife – and a world hub for migrating birds

More hills to roll down than you might think
